-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto (US 6,317,269). Yamamoto teaches a projection lens system having, from a screen side, a first lens group with a negative refractive power, a second lens group with a positive refractive power and a third lens group with a positive refractive power, where the third lens group has at least two cemented lenses (Example 1; R14-R19) and a lens (R20-R21) with a positive refractive power positioned on an opposite side of the cemented lenses to the screen.

***Allowable Subject Matter***

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest a first lens group positioned closest to the screen in the first lens group having an aspherical lens (claim 2) or the various recited numerical limitations (claims 3-5).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moskovich (US 5,625,495), especially Figs. 6 and 7, is cited to show a - + + projection system. The embodiments of Figs. 6 and 7 show doublets that are in close proximity, but are not both cemented.
